1. The following is an examiner's statement of reasons for allowance: The claims have been allowed because claim 1 recites a storage unit to dispense containers. There is a receiving area to receive containers and a dispensing area which is accessible by a user. There is a storage track to convey the containers. There is a selectively engageable stop positioned proximate the user-accessible dispensing area and which would pass the containers to another storage unit when disengaged. Claim 19 recites a method for dispensing containers where there is the receiving of containers on a storage track and the holding of the containers at a user-accessible dispenser area, and when a selectively engagable stop is engaged the containers are prevented from passing to another storage unit. The dispensing area and the stop are proximate each other. Claim 23 recites a storage unit to dispense containers. There is a means to convey containers and a user-accessible dispensing area. There is a means to pass the containers from the user-accessible area to another storage area. The means to pass the containers and the user-accessible area are proximate each other. The references to Schwimmer and Spamer et al do not disclose a user-accessible dispensing area and the stop proximate the user-accessible area. Also there is no disclosure for the containers to pass or not pass to another storage unit upon the selective engagement or disengagement of the stop member.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
